

# Global Clean Energy Investment Down in the Third Quarter of 2013

*Posted October 18, 2013*

[...]

“The latest setback reflects policy uncertainty in Europe, the lure of cheap gas in the US, a leveling-off in wind and solar investment in China, and a general weakening of political will in major economies. Governments accept that the world has a major problem with climate change but, for the moment, appear too engrossed in short-term domestic issues to take the decisive action needed.”

Interestingly, it appears that while investment data shows figures have fallen, clean energy shares on stock markets around the world are booming. Data measured by WilderHill New Energy Global Innovation Index, or NEX, shows that clean energy shares on the 9th of October nearly 47% up on the year so far and 74% above their respective lows reached in July of 2012.
